Alaska Percentage

Processing vessels must calculate an Alaska percentage to determine if a credit may be claimed. The Alaska percentage is calculated by taking the total pounds of raw salmon processed on the vessel in Alaska and dividing by the total pounds of raw salmon processed on the vessel in and outside Alaska during the tax year. If the percentage is less than 50%, you are not eligible for the credit. Shore-based facilities should use 100%.

How to calculate the Alaska percentage	Your Alaska percentage
$\frac{\text{Pounds of salmon processed on the vessel in Alaska}}{\text{Total pounds of salmon processed on the vessel in and outside of Alaska during the tax year}} = \text{Alaska Percentage}$	<div style="border: 1px dashed gray; width: 100px; height: 20px; margin: 0 auto;"></div> <div style="display: flex; align-items: center; justify-content: center; margin: 0 auto;"> <div style="border: 1px dashed gray; width: 100px; height: 20px; margin-right: 10px;"></div> = <div style="border: 1px dashed gray; width: 100px; height: 20px; margin-right: 10px;"></div> = <div style="border: 1px dashed gray; width: 100px; height: 20px; margin-right: 10px;"></div> % </div>

Recapture Provisions

Equipment used to claim a tax credit in a previous tax year that has been sold, disposed of or removed from service in the state is subject to recapture (payback). The amount of recapture is determined by the length of time the property was in use in Alaska. If the equipment was sold, disposed of or removed from service in:

- the same year it was placed in service or the first year following the year it was placed in service, **100%** of the credit must be recaptured (paid back)
- the second year following the year it was placed in service, **75%** of the credit must be recaptured
- the third year following the year it was placed in service, **50%** of the credit must be recaptured
- the fourth or subsequent year following the year it was placed in service, none of the credit must be recaptured

Equipment used on a vessel is considered to have been removed from the state, and therefore subject to recapture, on the first day of a tax year in which the Alaska percentage drops below 50% (use Part II to calculate the Alaska percentage).

PROCESSING LOCATION

ALASKA FISHERIES PROCESSING LOCATION CODE
MAPS & DIRECTORY

INSTRUCTIONS

1. PURPOSE

Fisheries Business Tax and Fishery Resource Landing Tax are shared with all organized boroughs and incorporated cities within the State of Alaska. This directory provides the taxpayer with a complete list of all incorporated cities with an assigned code for each to simplify the reporting process. Also, maps are provided to help identify the correct location code to use when processing or landing took place outside of an incorporated city within the state.

2. DETERMINING A LOCATION CODE

To determine the correct location code to report, use the guidelines as follows:

If fisheries resources were:

- Processed or landed within the city limits of an incorporated city in Alaska, use the location code of that incorporated city (See list on page 2).
- Processed or landed outside the city limits of an incorporated city but within Alaskan waters, go to the area maps on pages 3 – 9 and use the location code (listed in bold numbers) for the area where the processing or landing took place.
- Exported unprocessed outside of Alaska, **use location code 8888**.
- Pollock harvested in the Alaska Pollock fishery and not landed in Alaska (subject to tax in accordance with the American Fisheries Act), **use location code 9000**.

Enter one location code in the assigned block for each line entry on the Fisheries Business Tax or Fishery Resource Landing Tax return. Report each unique combination of species and location separately.

3. IF YOU NEED HELP

If you have questions regarding processing locations, contact the Share Tax Coordinator at 907.465.3776 or by email at: Dor.tax.Excise@alaska.gov .

All information provided in this directory is available on our internet home page. Our URL is: www.Alaska.gov
