

Identification of Proposed Changes to Tanker ROI Model Spreadsheet

In regards to the proposed changes to the Department of Revenue's ROI model instructions titled: "Computation of a Cost-of-Capital Allowance under 15 AAC 55.196 Incorporating Depreciation and Return on Invested Capital for Marine Vessels and Improvements," the following cells, as shown in yellow highlight in the attached Adobe.pdf file are the cells for which proposed changes are being made:

Tab: "InputSched1," cells E17:E26 have a new formula that applies the appropriate federal corporate tax rate from the Tax Cuts and Jobs Act of 2017 (P.L. 115-97) based on the year in question. The new formula is "`=IF(A17<2018,0.35,0.21)`" that enters the appropriate rate of 35% or 21%, based upon the year in question.

Tab: "InputSched1," cells C37:D51 have added the weighted average cost of capital for years 2004 - 2018.

Tab: "InputSched2," cells C12:C36 are also proposed for amending to include the appropriate federal corporate tax rate from the Tax Cuts and Jobs Act of 2017 (P.L. 115-97) based on the year in question. The new formula is "`=IF(A17<2018,0.35,0.21)`" that enters the appropriate rate of 35% or 21%, based upon the year in question.

Tab: "InputSched2," cells D12:D36 have been changed to incorporate a "`=VLOOKUP`" function referencing the weighted average cost of capital (WACC) from tab "InputSched2."

Following is a link to an Adobe.pdf file showing the changes to the affected tabs of the ROI model spreadsheet: <http://tax.alaska.gov/programs/documentviewer/viewer.aspx?112n>
